The LinkPlas-ter

VOLUME 1, ISSUE 1

19 JANUARY 2009

Welcome Back to REALITY ...

... and the first issue of the LinkPlas E-newsletter.

After a rather trying 2008, we hope you have had a much deserved break and are ready for a vibrant 2009.

The team at LinkPlas are excited about the coming year and are shunning the "R" word, (you know the one), in favour of Optimism, to boost morale and ensure we all have a very positive 2009.

We are therefore thrilled to already have some new developments on the horizon and would like to share them with you ...

Deryn French - Sales and Marketing

Firstly we would like to welcome on board Deryn

French to carry out the Sales and Marketing function here at LinkPlas. Deryn comes from a sales background in retail and FMCG, previously working as a Representative in the water industry where she displayed a natural talent for sales.

Deryn is passionately committed to building relationships and looks forward to meeting all of our valued customers in 2009.

Quarterly E-newsletters

With Deryn now on board Quarterly E-newsletters will be sent out to you our valued customer to keep you up to date and informed of the latest activities at LinkPlas.

LinkPlas Accolades

Please Note:

As part of this email initiative we are updating our database so if you do not wish to receive future E-newsletters from LinkPlas Ltd or you want to update your contact details please reply to deryn@linkplas.com and we will make the changes.

Products up for Grabs "Get in Quick"

The **H750** and **H330** (Pictured below-right) are now up for grabs and ready to go into production. These bottles have a rectangular base and unique indent which give them character and class. Although they were originally designed as water bottles the possibilities for them are endless, the H330 especially can be used for anything from sauce and edible oil to mois-

turising creams and liquid hand soap. The two available sizes are 750ml (H750) and 330ml (H330). The 330ml comes in a heavy or light-weight and both come with a 28-410 neck and tamper evident option.

The **H300A** (pictured above right) is also now available and ready for production. This bottle is ideal for sauce, dressings

or vinegrettes and comes in 275ml (heavy weight) and 300ml (light weight) sizes with optional UV inhibitor and oxygen scavenger.

If you are interested in these bottles or using our services to custom create a bottle to suit your product please see the LinkPlas contacts to the left of this newsletter or visit our website www.linkplas.com

"Quality is never an accident: it represents the wise choice of many alternatives" William A. Foster
